Summary

Results-oriented Informatics Engineering graduate, looking for a challenging position to apply skills in front-end and back-end web development. Has a track record of success in designing and building dynamic web applications with a focus on user experience and system efficiency. Proficient in utilizing the latest technologies to optimize application performance and ensure high scalability and security.

Education

Bachelor of Computer Science

Universitas Pembangunan Nasional Jawa Timur (2020-2024)

S1 - Informatika

IPK: 3.91/4.00

Thesis on "development of a recommendation system to help solve a problem using artificial intelligence".

Experience

PT Pertamina Training & Consulting (Apr 2025 - Present)

Programmer IDMS

Built and monitored web-based applications using React and Next.js to support real-time operations and integrated database storage management. Responsible for developing dynamic user interfaces, handling client-side and server-side rendering, and ensuring smooth data synchronization between the application and the database. Implemented real-time features to maintain up-to-date data availability and system reliability. Performed continuous monitoring, debugging, and performance optimization to ensure application stability, scalability, and efficient data processing.

PT Arkatama Multi Solusindo (Feb - June 2023)

Fullstack Web Developer

Designed and developed complex full-stack web applications with a focus on performance optimization, improving system efficiency through enhanced backend architecture, database optimization, caching, and front-end performance strategies. Built scalable APIs for third-party integrations and collaborated closely with designers and developers to deliver responsive, user-friendly interfaces.

PT Ruang Raya Indonesia (Aug - Dec 2022)

Frontend Engineer

Managed the full lifecycle of front-end development using JavaScript and React, delivering projects on schedule while collaborating with designers and stakeholders to enhance UI/UX and client satisfaction. Conducted usability testing and performance optimization, developed reusable components with effective state management, and continuously adopted modern front-end best practices to ensure scalable, maintainable code and improved team productivity.

Certification

Junior Web Developer	Project Management	Google Project Management
BNSP (2023)	Digital Talent Academy (2025)	Google (2025)

Additional Information

Technical Skills: Have skills in Microsoft Office and Web Programming: HTML, CSS, JavaScript, React, Laravel framework, using front-end tools such as Bootstrap, version control with Git, basic back-end understanding with PHP or Node.js, working with RESTful APIs, database management such as MySQL, web design responsive, debugging, and have good communication skills, time management, and working in a team.
